01 A PART OF
CUSTOMERS' VALUES

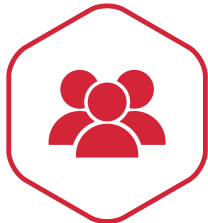

01 A PART OF CUSTOMER VALUES

We aim high to provide a high quality outsourcing service meeting customers' demands and anticipated time.

The high quality services provided by a strong and experienced cadre of enthusiasts.

With relevant experience, firm discipline and enthusiasm in working with international customers, we believe to offer outstanding merits in terms of quality production and customer care services.

Effective teamwork

Harmonious and efficient collaboration between team members encourages us to combine individual strengths to deliver the best team results matching customers' expectation.

Goals to raise more added values

Since creating and increasing added values in every project are at the top of our agenda, we always focus on producing beyond customers' expectation. By this, we can form and maintain not only a long-standing association but also the long-term commitment to the full development of our company.

OUR WORKING PROCESS

03 ABOUT
US

03 ABOUT US

Our passion for programming knows no limits

We have a real passion for building IT capabilities that are reliably valuable to life.

Our union is strength.

Teamwork is one of our core values.

Our willingness to learn is a huge advantage.

The thorough understanding of IT infrastructure gives us an edge in the technology society.

Our working model is formed as a TIM

The company's non-hierarchical structure motivates the relationships and mutual understanding in working between team-leaders and team members.

ABOUT US 03

We choose Scrum as our software development frame-

Scrum allows us to manage product development, ensure consistent work and gain efficiency, flexibility, and scalability with less risk.

Scrum enables teams to self-organize by stimulating a close online collaboration and daily face-to-face communication among team members.

We think positively, speak politely and do creatively.

This is not only a goal but also daily common practice.

We prioritize service culture development.

Positive thinking is a deep root of our attitude towards life and work.

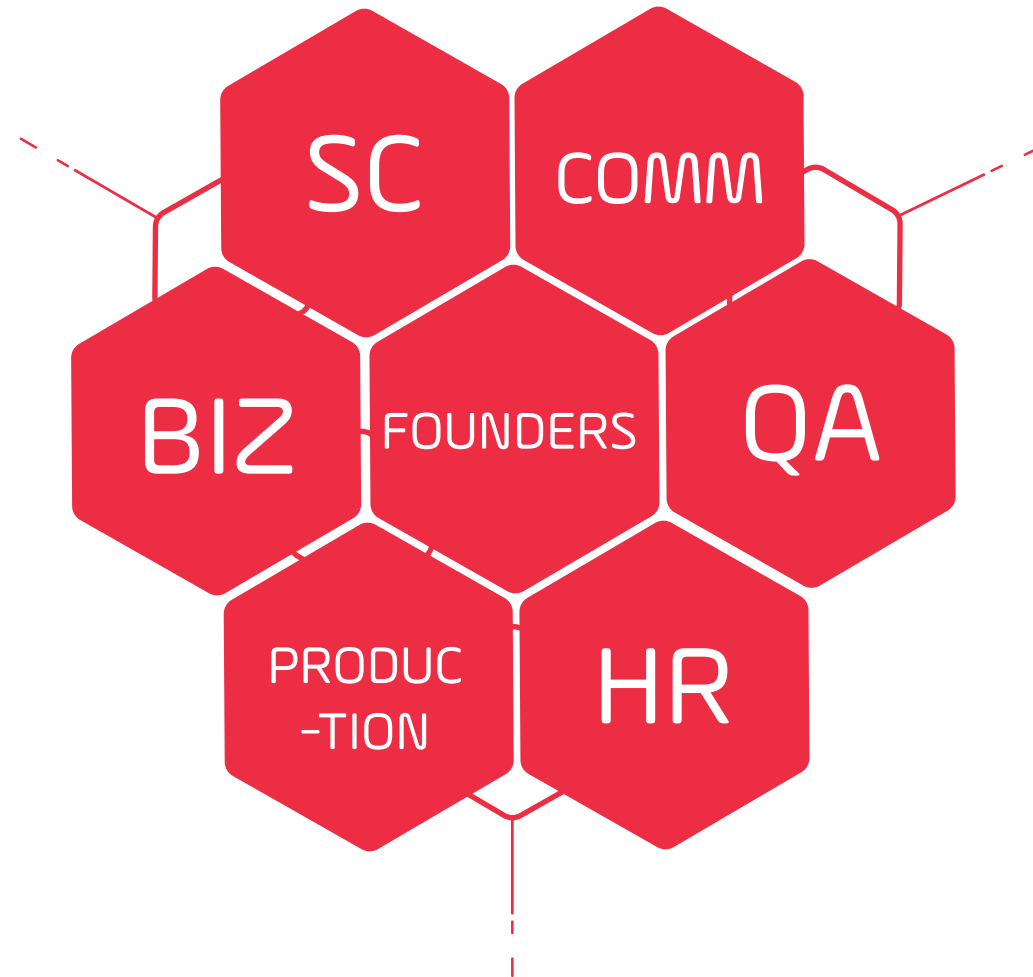

EQUALITY, UNITY, RESPECT, AND RESPONSIBILITY

TIM model is a key attempt to foster a human-centered working environment in which equality, fairness and respect are guaranteed.

Siten's individuals are divided into tims which:

- Works as a unit to reach its goals.
- Proactively collaborates to support other teams to achieve the company's goals.
- Is comprised of only two divisions: timLead (leader) and timer (member) of the company. No boss, no employee.

We have been building and using our own web-based management system called timwook which is particularly exclusively for TIM model companies.

04 OUR
TIM

Hoa Nguyen

Production timLead

(+84)90 602 2469 | hoa.nguyen@siten.vn

SITEN AWARDS

CHRISTMAS PARTY

OUR
CULTURE **05**

SITEN AWARDS
Annual Year-end Awards

- Siten Awards was first set up at 2017 Christmas Party which aimed to honour valuable contributions of both individual and team outstanding performances over one year devoting to the targets of Siten.
- Siten Awards was also a stage for Siteners to show and perform their talents.
- Categories for voting: Inspirational Ambassador, Potential New Siteners, Siteners of the Year, Project of the Year, etc.

OUR CULTURE **05**

COMPANY TRIP
The Annual Biggest Trip

Company Trip is an annual event of Siten functioning as a respite after a nerve-racking time of projects and hectic working schedule. Siten also takes it as an opportunity that fosters a bond of friendship, as well as creates precious moments among Siteners, between Siteners and families.

OUR CULTURE 05

LAZY DAY Quarterly event

ON THIS DAY

Annual celebration

On This Day (OTD) celebrates the day Siten's members joined the company and appreciate everyone's contributions to the development of Siten.

E-CONTRACT

E-contract System

Client: Vietnam

Time: 10/2021 - Present

Man-month: 200+

Description:

The e-contract project is to build a system that allows businesses to use, store, manage, and digitize contracts and documents. Some highlight features of the system can be named as follows:

- Digitally signing anytime, anywhere: allowing users to upload documents and use electronic signatures) that saves time and money while ensuring legality
- Create new documents with customizable input fields, reusable text templates
- Create and manage contract batches to optimize data entry, approval and signing
- Use signing methods: eKYC, OTP, RemoteSigning, USB
- Access anytime, anywhere on web and mobile platforms
- Authentication: the service provider authenticates the part of the contract - between its clients and their partners - after signing and submitting it to the competent authority for further authentication to help ensure the reliability of the contract.

Programming Languages: Java, Angular

Technologies & Frameworks: Spring, Microservice

07 ACCOMPLISHED
PROJECTS

ENTERPRISE DIGITIZATION Enterprise Digitization System

Client: Vietnam

Time: 07/2021 - Present

Man-month: 50+

Description:

Enterprise Digitization is a system built on both web and app platforms, allowing payroll, administrative and human resource management for a variety of corporate customers from SME businesses to large enterprises. In addition to basic features, the system also supports advanced features such as task management, e-document, e-contract storage, internal communication, etc.

This is a system that helps solve the problem of business digitization during operation quickly and conveniently, including diverse and full of management features for an enterprise but integrated on only one single platform.

Programming Languages: C#, Java, JavaScript, HTML, SCSS

Technologies & Frameworks: .NET Core 3.1, .NET Framework 4.7, VueJS 2, MongoDB, Java Spring Boot

DOCUMENT AUTOMATION

Document Automation and Credit Management Support

Client: Vietnam

Time: 10/2019 - 06/2021

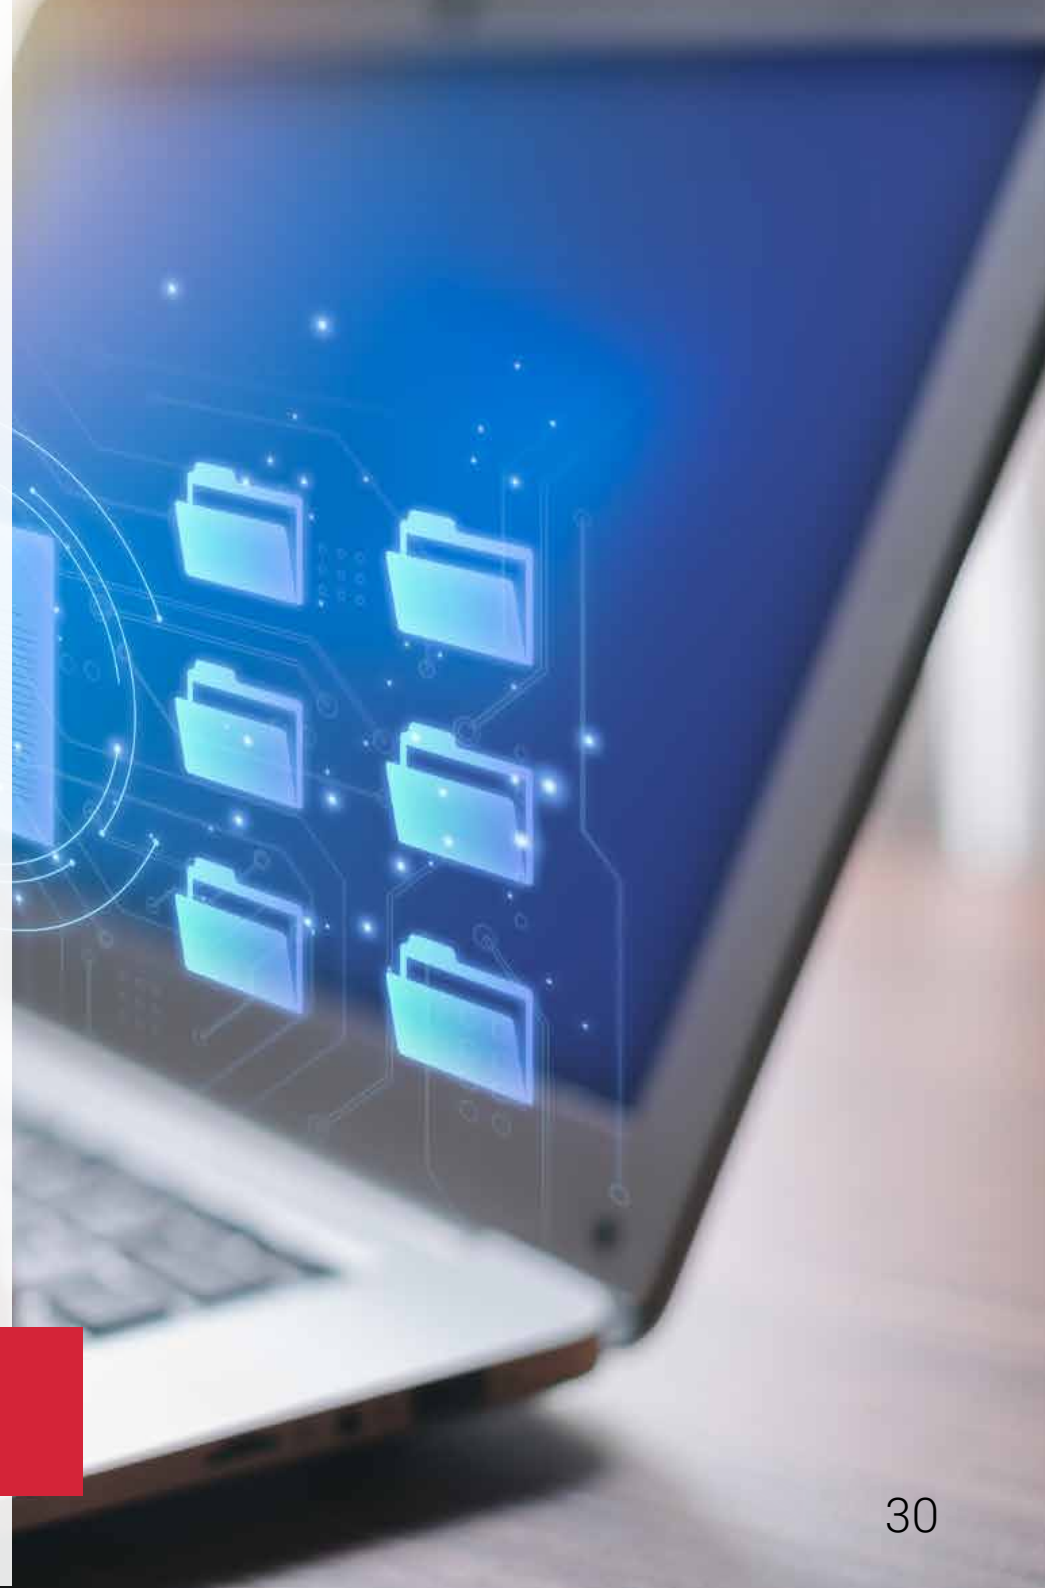

Man-month: 100

Description:

- Assist in drafting contract documents in the banking sector, including types of contracts: credit, collateral, guarantee commitment, contract appendices, etc.
- Support to export documents in .doc, .pdf format and integrate into the document circulation system in the bank.
- Perform accounting of banking operations in T24 such as: loan accounting, asset accounting, passbook accounting, limit accounting, overdraft accounting, card accounting, money transfer accounting that helps to optimize data entry and accounting approval.
- Support to declare contract forms that change depending on the issuance period, and at the same time integrate loan management and T24 system - the core banking system used to manage and track business operations that has been applied in more than 400 banks worldwide.
- The application of this software in the banking system not only creates convenience and saves processing time for bank staff, but also increases transparency in the management and storage of records and contracts.

Programming Languages: Java, AngularJS

Technologies & Frameworks: Spring, SpringBoot, CI/CD, Microservice, ServiceMesh, IBM DataPower, T24, Los, Web Socket

07 ACCOMPLISHED
PROJECTS

INVENTORY MANAGEMENT

Inventory management system

Client: Vietnam (AEON Mall Long Bien)

Time: 04/2022 - 08/2022

Man-month: 13

Description:

- Inventory management system is a multi-platform system for a famous supermarket brand in Vietnam, including web and mobile applications to support warehouse managers and employees in managing import-export goods, warehouse supplies and reports. The system also supports asset maintenance planning and implementation, helping to reduce risks during machine operation and maintenance costs for equipment.

After three months of deploying for customers, the system has recorded a very large number of goods and import and export orders.

Programming Languages: Java, Javascript

Technologies & Frameworks: Spring Boot, Angular, Bootstrap, JQuery, MySQL

BIIN TOURISM

Tourism App

Client: Vietnam (Biin JSC.)

Time: 08/2019 - Present

Man-month: 50

Description:

An application supports connecting tourists with tour guides, as well as travel agencies in Vietnam.

- App for tourists is a multimedia connection application that provides information and utilities for tourists. Developed in Android and iOS platforms, the app includes some following highlight features: on-going tours management; information checking; discussion with tour guides; completed tours search; feedback; direct shopping experience on app with exclusive utilities for tourists.

- App for tour guides is also a multimedia connection application with the following features: tourists management; information check, discussion with tourists; feedback.

Programming Languages: C#, React-Native, Html/Css/Javascript
